Help to educate local people in Glenrothes about the true nature of
Raytheon and its role as a major arms manufacturer.

How to get there?

By public transport: From Edinburgh bus station, take the X59
Stagecoach bus which leaves throughout the day. It takes you to
Glenrothes town centre itself, 5 to 10 minutes walk away from
Raytheon. Taking the 1335 or 1435 gets you to Glenrothes at 1445
and 1545 respectively. Returning to Edinburgh, catch the 1835 or
1935, arriving in Edinburgh at 1940 and 2040 respectively.

By car: From Edinburgh, cross the Forth Road Bridge, then take the
A92 to Glenrothes. Go straight over the Bankhead roundabout and
take the first exit at the following Queensway roundabout (A911).

Stay on the A911 until the next roundabout and take the 3rd exit
onto Queensgate.

Why Raytheon Systems Limited?

RAYTHEON SYSTEMS Ltd provokes international instability; facilitates the slaughter of innocent civilians; profiteers from the US and UK's "war on terror"; is a provider for the US "Star Wars" programme; and enables Israel to continue violating international laws and the human rights of the Palestinian people.

Raytheon and RSL provide a major function at the "Star Wars" facility at Fylingdales, Yorkshire being at the forefront of installing the upgrade of the radar to be used in the US National Missile "Defence" programme.

This system has already provoked global instability, and will provoke arms proliferation, a space arms race, and gives the US the ability to strike with impunity. It puts the UK at the frontline in future wars.

RSL profiteers from the so called "war on terror" contributing to the killing of innocent civilians in Lebanon, Afghanistan and Iraq.

Raytheon is a key part of the US's military-industrial complex and a major manufacturer of Israeli weapons. In providing for the Israeli arsenal, Raytheon has an active role in enabling Israeli forces to engage in practices that violate international law and the human rights of Palestinians.

Raytheon expands its destructive work beyond earth, being at the frontline of the militarisation of space through Star Wars.

The system will tie the UK more tightly to US foreign and military policy. Missile defence is about control – and is part of the US military strategy for "Full Spectral Dominance" which means dominance of land, sea, air, space and information - and RSL is enabling this to happen.

The US is reportedly stockpiling Raytheon Tomahawk missiles in preparation for a possible attack on Iran. Any attack is in RSL's own interests. It profits from the promotion of global conflict, whilst others live in terror.
